

Chad Edge – Director of Engineering: Your Next Technical Leader

As an accomplished Director of Engineering with a proven track record of leading dynamic engineering teams, I bring a wealth of experience and technical expertise to the table. Having worked across large-scale domains and diverse technology stacks, I have successfully led teams, spearheaded complex projects, and delivered innovative solutions that drive efficiency, scalability, and bottom-line growth.

Why Hire Me?

1. Proven Leadership in Engineering

- Over **20 years of experience** in software engineering, with **10+ years in leadership roles**.
- Successfully managed teams from **30+ in-house engineers** to multi-hundred offshore personnel.
- Skilled in leading cross-functional teams, including Dev, QA, DevOps, and Product, to ensure seamless collaboration and execution.
- Mentored emerging leaders, resulting in new managers and technical leads under my guidance.

2. Technical Mastery Across a Broad Range of Technologies

- Expertise in **AWS, Kubernetes, Docker**, and other cloud-native solutions.
- Solid grasp of **microservices architecture**, delivering optimized cloud systems for high-demand video platforms.
- Extensive experience with **CI/CD, shift-left practices**, and **automation**, driving down operational costs while enhancing system agility.
- Proficient in both **SQL and NoSQL databases**, with a long history of building scalable, distributed systems.
- Comfortable in AI/ML environments and adept at languages like **Python, Go, PHP**, and more.

3. Track Record of Transformational Success

- Led a cloud migration project that reduced operational costs by **25%**, enhancing system agility for Paramount's video streaming services.
- Spearheaded the reduction of runtime errors by **80%** through process improvements and reusable components.
- Cut technology deployment time by **40%** using agile methodology, significantly improving team productivity.
- Developed PII-compliant systems, resulting in cost savings and heightened data security for high-profile projects.

4. Strategic Problem Solver

- Adept at converting high-level "bar-napkin" ideas into concrete, scalable solutions.
- Experienced in large-scale integrations, including merging multiple CMS and DAM systems, saving time and reducing redundancy by **1300%**.
- Expert at streamlining workflows for enhanced project delivery, ensuring both cost and time efficiencies across complex ecosystems.

5. Agile and Future-Focused

- As a **Certified Scrum Master**, I excel at fostering agile environments where teams can rapidly iterate and deliver.
- Known for implementing a SAFe-based approach tailored to each organization's specific needs, boosting collaboration and alignment with external stakeholders.

Let's Talk!

I am eager to bring my innovative solutions, technical acumen, and proven leadership to your organization. With a history of success in fast-paced, high-stakes environments, I am confident in my ability to make an immediate and lasting impact.
